### **DETAILED ACTION**

1. This Office Action is in response to applicant's amendment filed on July 11, 2005.

#### ***Allowable Subject Matter***

2. **Claims 18-33 are allowed.**

#### **Reasons For Allowance**

3. The following is an examiner's statement of reasons for allowance:

Claims 18 and 33 are allowable over the prior art of record because the teachings of the references taken as a whole do not teach or render obvious the combination set forth, including that the hollow pivot or axle is mounted on a cylindrical seat at the support member so as to support the rolling wheels and to allow the latch to slide.

Rollwande (DE 3,248,498) discloses the combination of a latch with a section door for closing the section door at a desire location.

The section door includes a number of horizontally elongated elements (1 and 2); hinges mutually connecting the elements, and side guide bars (7) for sliding engagement of the section door with one of the side guide bars having an opening.

The side guide bar (7) has a vertical branch, an upper horizontal branch, and a curved connection branch joining together the vertical and horizontal branches.

The latch (5) is located sideways, displaceable between an inactive position and an active position, and intended for engaging, in its active position, in the opening (Figure 1) provided in one of the side guide bars (7).

The latch (5) is located coaxially with one of the small wheels (6) intended to slide within the side guide bars (7) of the section door.

Boyles (US 3,163,033) teaches that it is well known in the art to have more than one roller (3) that turns about horizontal pivots or axles.

However, Rollwande, as modified by Boyles, fails to disclose that the hollow pivot or axle is mounted on a cylindrical seat at the support member so as to support the rolling wheels and to allow the latch to slide. Rollwande discloses that the hollow pivot or axle is mounted on the rolling wheel and the latch slides within.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
